## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and have grammatical and idiomatic errors. In claim 1, lines 11 and 12, "in the pendulum plane in formlockingly compatible opening".

Claim 1 recites the limitations "the pendulum plane" in line 11, "the distance" in line 12 and "the inclination angle" in line 13. There is insufficient antecedent basis for these limitations in the claim. It is unclear as to what "distance" Applicant is setting forth. How is the pendulum plane defined in relation to vertical (strip (3) plane) and/or axial directions of the mill that have been claimed as structure?

Regarding claim 5, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
